SUBJECT: Sampling and Analysis of Wastes at Smelters, Refineries
and Other Facilities Processing Beneficiated Ores

FROM: Dexter Hinckley, Task Manager
Waste Treatment Branch, (WH-565A) *areh*

TO: Addressees

The OSW study of wastes at smelters, refineries and other facilities processing beneficiated ores has entered the sampling and analysis phase. Altogether 50 sites will be visited by either PEDCo or Radian. Those to be visited in your Region are shown on the attached list. If any of your staff would like participate in the site visits, please have them contact me (382-7917). Also, if you have any recent reports on waste volumes, management, and/or chemical characteristics at these sites, I would welcome copies.
